Weekly Wat : Fun with Swift 3.0 Edition

How to use Firebase:

1. Set up Firebase on the online console
2. Install the sdk using CocoaPods
3. Import *Firebase* and *FirebaseDatabase* into the Swift files
4. Segmentation Fault 11

WAT IS LOVE?

What happened?

- The Swift interpreter is written in C++
- Sometimes it get's confused
- When it get's confused by code that's too good it decides to segfault
- Graceful denigration is for losers
- You should contribute to Swift, it's open source and on Github
- This wouldn't happen if you contributed to open source
